

GenAI Developer Capstone & Exam

The “AI-Enabled” promise made real — production GenAI on AWS, plus the GenAI Developer Professional credential.

This is where the edition's “AI-Enabled” promise becomes fully real. Extend FieldNote with production GenAI: advanced RAG, Bedrock Agents, LLM evaluation and observability, prompt engineering at scale, and multi-model orchestration.

WHAT YOU'LL BE ABLE TO DO

- **Ship advanced RAG.** Production retrieval patterns beyond the basics.
- **Build agentic workflows.** Tool-using applications with Bedrock Agents.
- **Evaluate and observe LLMs.** Quality evaluation and observability.
- **Engineer prompts at scale.** Repeatable prompting and multi-model orchestration.
- **Earn AIP-C01.** Sit the GenAI Developer – Professional exam.

PREREQUISITES

AIDD-AWS-4 completion and the AWS Data Engineer Associate credential · the defunded FieldNote project.

CREDENTIAL MAPPING

Terminal credential: AWS Certified Generative AI Developer – Professional (AIP-C01). Optional but strongly encouraged.

SPECIALIZE — FIELDNOTE FINAL (GENAI)

Adds production GenAI features to FieldNote and earns the AWS GenAI Developer Professional credential — the second of the edition's two credentials.

MODULES	TIME	FORMAT	OUTCOME
5A–5F	~32–40h	1:1 + defense	AIP-C01
